

# ENVIRO CARRY ALL SUSPENSION & GEL STRENGTH ENHANCER

## DESCRIPTION

Enviro Carry All is an easy mixing biopolymer additive used to enhance the carrying capacity of a drilling Fluid. The additive will greatly enhance the Gel Strength profile of the fluid and will thus create a cleaner bore.

## RECOMMENDED USE

Enviro Carry All is designed to enhance the gel strength of the drilling fluid for improved suspension and transporting of drill cuttings on extended bores. Enviro Carry All will perform effectively in most water conditions.

## MIXING AND APPLICATION

Pour slowly through a standard venturi hopper at maximum shear to avoid lumping. Add 0.5-2.0 kilograms per cubic metre

## PACKAGING

25Kg bags, 40 per pallet.

## Characteristics

- Enhances gel strength with little increase in viscosity.
- Easily dispersed in both bentonite/non-bentonite systems.
- Transports cuttings easily on extended bores.
- Performs well in most water conditions
- Food grade material
- Environmentally friendly
